Chapter 1 General Provisions

1.1 This rule is formulated in accordance with the Securities Law of the People's Republic of China, the Administrative Measures for Securities Exchanges, and other laws, administrative regulations, departmental rules, normative documents (hereinafter collectively referred to as laws and regulations) and the Articles of Association of the Shanghai Stock Exchange, in order to regulate securities market trading activities, maintain securities market order, and protect the legitimate rights and interests of investors.

1.2 This rule applies to the trading of stocks, funds, warrants, depositary receipts, and other trading instruments approved by the China Securities Regulatory Commission (hereinafter referred to as "securities") listed on the Shanghai Stock Exchange (hereinafter referred to as "the Exchange"). Where this rule does not provide otherwise, other relevant regulations of the Exchange shall apply.

Trading of depositary receipts is subject to the relevant regulations for A-share trading. Where the Exchange has separate regulations for trading depositary receipts, preferred shares, publicly offered infrastructure investment funds, etc., those regulations shall prevail.

1.3 Securities trading shall adhere to the principles of openness, fairness, and impartiality.

1.4 Securities transactions shall comply with laws, administrative regulations, departmental rules and the relevant business rules of the Exchange, and adhere to the principles of voluntariness, compensation and good faith.

1.5 Securities trading shall be conducted through paperless centralized trading or other methods approved by the China Securities Regulatory Commission.

Chapter Two: Trading Markets

Section 1 Trading Venues

2.1.1 This exchange provides trading venues and facilities for securities trading. The trading venues and facilities consist of trading mainframes, trading halls, participant trading business units, order placement systems, and related communication systems.

2.1.2 The Exchange has a trading floor. Members of the Exchange (hereinafter referred to as members) may submit their applications through traders stationed in the trading floor.

Except with special permission from the exchange, only the following personnel are permitted to enter the trading hall:

- (a) Registered traders;
- (ii) On-site supervisors.

Section 2 Transaction Participants and Transaction Rights

2.2.1 Members and institutions recognized by the Exchange that wish to conduct securities trading in the Exchange's market must apply to the Exchange for trading rights and become participants in the Exchange's trading activities.

Trading participants shall conduct securities transactions through the participant trading business unit opened by the Exchange and comply with the relevant provisions of this rule and other business rules of the Exchange regarding securities trading business.

2.2.2 A participant trading unit refers to the basic unit by which a trading participant can participate in securities trading on the Exchange, enjoy and exercise relevant trading rights, and accept the Exchange's relevant trading business management.

2.2.3 The detailed rules for the management of participants' trading business units and trading permissions shall be separately stipulated by the Exchange.

Section 3 Trading Instruments

2.3 The following securities may be listed and traded on this exchange:

- (a) Stocks;
- (ii) Funds;

- (iii) Warrants;
- (iv) Depositary receipts;
- (v) Other trading instruments approved by the China Securities Regulatory Commission.

Fourth trading session

2.4.1 The trading days of this exchange are Monday to Friday.

The exchange market will be closed on national statutory holidays and holidays announced by the exchange.

2.4.2 For trading using the competitive bidding method, unless otherwise stipulated in these rules, the opening call auction period is from 9:15 to 9:25 on each trading day, the continuous bidding period is from 9:30 to 11:30 and from 13:00 to 14:57, and the closing call auction period is from 14:57 to 15:00.

For fund trading, the opening call auction period is from 9:15 to 9:25 on each trading day, and the continuous auction period is from 9:30 to 11:30 and from 13:00 to 15:00.

Securities that were suspended from trading and then resumed trading during the trading day are excluded.

With the approval of the China Securities Regulatory Commission (CSRC), the Exchange may adjust trading hours as needed for market development.

2.4.3 If the market is suspended during trading hours

for any reason, the trading hours will not be extended.

Chapter Three: Securities Trading

Section 1 General Provisions

3.1.1 After accepting a buy or sell order from an investor, a member shall report to the exchange in accordance with the contents of the order and assume the corresponding transaction and settlement responsibilities.

When a member accepts an investor's buy or sell order and completes a transaction, the investor shall deliver to the member the proceeds from the sale of the securities or the purchase of the securities on the investor's behalf.

3.1.2 Trading participants send buy and sell orders to the Exchange's trading host through their relevant order system, participant trading business unit, and reporting channels, and complete transactions in accordance with these rules. The transaction results and other transaction records are sent to the trading participants by the Exchange.

3.1.3 Transaction participants shall properly keep the entrustment and declaration records in accordance with relevant regulations.

3.1.4 Securities purchased by investors may not be sold before settlement, except for those subject to day trading.

Securities resale transactions refer to the sale of all

or part of securities purchased by an investor after the transaction has been confirmed but before settlement.

3.1.5 The following commodities are subject to same-day trading:

- (a) Bond exchange-traded open-ended index funds;
- (ii) Exchange-traded money market funds;
- (iii) Gold-backed exchange-traded open-ended funds;
- (iv) Commodity futures exchange-traded open-ended index funds;
- (v) Cross-border exchange-traded open-ended index funds;
- (vi) Cross-border listed open-ended funds;
- (vii) Warrants;
- (viii) Other varieties approved by the China Securities Regulatory Commission.

The cross-border exchange-traded open-ended index funds and cross-border listed open-ended funds mentioned above are limited to open-ended funds that implement same-day revolving transactions of the constituent securities or investment targets of the tracked index.

B shares will be subject to revolving trading starting from the next trading day.

3.1.6 As needed by the market, the Exchange may implement a primary dealer system. Specific measures will be stipulated separately by the Exchange and will take

effect after being approved by the China Securities Regulatory Commission.

3.1.7 Investors who participate in securities trading or related business in the Exchange's market shall be fully aware of and understand the relevant risk matters, laws and regulations and the Exchange's business rules, comply with the relevant requirements for investor suitability management, and make a prudent judgment on whether to participate in securities trading or related business based on their own risk awareness and tolerance.

Members should earnestly fulfill their obligations to manage investor suitability, fully disclose investment risks, and guide clients to invest rationally.

3.1.8 Any programmatic trading that generates or issues trading instructions automatically through computer programs shall comply with the regulations of the China Securities Regulatory Commission (CSRC) and report to the Exchange, and shall not affect the security of the Exchange's system or the normal trading order.

Section Two: Entrustment

3.2.1 Securities trading on this exchange is conducted through designated trading or other entrusted trading systems stipulated by the exchange. Designated trading regulations do not apply to overseas investors engaging in B-share trading.

Designated trading means that investors participating in the trading of securities on this exchange must designate a member in advance as their trustee for trading securities, and participate in the trading of securities on this exchange through that member.

3.2.2 When a designated trading system is adopted, investors shall sign a designated trading agreement with the designated trading member, clearly defining the rights, obligations, and responsibilities of both parties. Once the designated trading agreement is signed, the member may submit the designated trading procedures to the exchange's trading system upon the investor's application.

If an investor wishes to change their designated trading partner, they must submit a declaration of intent to withdraw to the designated member, which will then issue a withdrawal instruction. Members shall not restrict, obstruct, or delay the withdrawal process for investors who meet the withdrawal criteria.

This exchange accepts designated trading orders during market hours.

3.2.3 Other matters concerning the designated transaction shall be handled in accordance with the relevant regulations of this Exchange.

3.2.4 Investors who buy or sell securities shall open a securities account and a funds account, and sign a

securities trading agency agreement with a member. After the agreement takes effect, the investor becomes a client of the member's brokerage business (hereinafter referred to as the client).

Investors should open securities accounts in accordance with the regulations of the securities registration and settlement institution.

3.2.5 Clients may authorize members to buy or sell securities through written, telephone, self-service terminals, internet, or other self-service methods. Telephone, self-service terminal, and internet self-service orders shall be executed in accordance with relevant regulations.

3.2.6 When a client participates in securities trading through self-service order placement, the member shall sign a self-service order placement agreement with the client.

3.2.7 Unless otherwise stipulated by this firm, the client's instructions shall include the following:

- (a) Securities account number;
- (ii) Securities Code;
- (iii) Direction of buying and selling;
- (iv) Quantity entrusted;
- (v) Commissioned price;
- (vi) Type of entrustment;

(vii) Other requirements of this firm and its members.

3.2.8 Clients may place orders with members to buy or sell securities using limit orders or market orders.

A limit order is an order placed by a client to a member to buy or sell securities at a price specified by the client. The member must submit a buy order at or below the specified price and a sell order at or above the specified price.

A market order refers to a client instructing a member to buy or sell securities at market prices.

3.2.9 Clients may cancel the unexecuted portion of their orders.

3.2.10 Upon confirmation of any revoked or invalidated entrustment, the member shall promptly return the corresponding funds or securities to the client.

3.2.11 Members who provide margin trading services to clients for buying and selling securities shall do so in accordance with relevant regulations.

Section 3 Application

3.3.1 The Exchange accepts bids from trading participants from 9:15 to 9:25, 9:30 to 11:30, and 13:00 to 15:00 on each trading day.

During the opening call auction from 9:20 to 9:25 and the closing call auction from 14:57 to 15:00 each trading day, the exchange's trading system will not accept order cancellation requests; during other times when trading

requests are accepted, unexecuted orders can be cancelled. Cancellation instructions are only valid after confirmation by the exchange's trading system.

The firm may adjust the application submission period if it deems necessary.

3.3.2 Members shall promptly submit their applications to the firm in the order of the client's entrustment.

3.3.3 The Exchange accepts limit orders and market orders from trading participants.

3.3.4 Depending on market needs, the Exchange may accept market orders in the following formats:

(i) The best 5 levels of immediate execution and the remaining cancellation order means that the order will be executed one by one at the counterparty's price within the counterparty's real-time best 5 price levels, and the remaining unexecuted part will be automatically cancelled.

(ii) The remaining order of the best 5 levels of immediate execution is converted into a limit order. That is, the order will be executed one by one at the price of the counterparty within the five best price levels in real time. The remaining unexecuted part will be converted into a limit order at the latest execution price of the order ...

(iii) Best Price Order: This order uses the best price available to the bidder in the centralized order book at the time it enters the trading system as its bid price .

If there are no bids available to the bidder in the centralized order book when the best price order enters the trading system, the order will be automatically cancelled .

(iv) Best counterparty price order, which is an order price based on the best counterparty quote in the centralized order book when it enters the trading system . If there are no counterparty orders in the centralized order book when the best counterparty price order enters the trading system, the order will be automatically cancelled ;

(v) Other methods stipulated by this office.

3.3.5 Market orders should include the highest bid price (hereinafter referred to as the buy protection limit price) or the lowest ask price (hereinafter referred to as the sell protection limit price) that investors are willing to accept.

When the exchange's trading system processes market orders as stipulated in the preceding paragraph, the transaction price of a buy order and the order price converted to a limit order shall not be higher than the buy protection limit price, and the transaction price of a sell order and the order price converted to a limit order shall not be lower than the sell protection limit price.

3.3.6 Market orders are only applicable to

transactions during continuous trading hours, unless otherwise stipulated by the Exchange.

3.3.7 Limit order instructions shall include the securities account number, brokerage code, securities code, buy/sell direction, quantity, price, etc.

Market order instructions should include the order type, securities account, brokerage code, securities code, buy/sell direction, quantity, etc.

Application instructions shall be transmitted in the format prescribed by this office. This office may adjust the content and method of application as deemed necessary.

3.3.8 When purchasing securities through competitive bidding, the order quantity shall be 100 shares (units) or an integral multiple thereof.

When selling securities, any remaining balance of less than 100 shares should be sold in one transaction.

3.3.9 The maximum number of shares (units) that can be submitted in a single securities transaction shall not exceed 1 million shares (units) .

The exchange may adjust the maximum number of securities that can be submitted in a single transaction, depending on market needs.

3.3.10 Different securities are traded using different pricing units. Stocks are priced per share, funds are priced per unit, warrants are priced per warrant, and

depository receipts are priced per depository receipt .

3.3.11 The minimum price increment for A-shares is RMB 0.01, for fund and warrant transactions it is RMB 0.001, and for B-share transactions it is USD 0.001.

Our exchange may implement different minimum price increments for bids based on the stock price level.

3.3.12 As needed by the market, the Exchange may adjust the minimum increment for the quantity and price of any type of securities in a single transaction.

3.3.13 This exchange imposes price fluctuation limits on stock and fund trading, with a fluctuation limit of 10%.

The formula for calculating the price limit for stock and fund price fluctuations is: Price limit = Previous closing price $\times$ (1 $\pm$ Price limit ratio).

Stocks falling under any of the following categories are not subject to price fluctuation limits:

(a) The first five trading days after the initial public offering (IPO) of the shares;

(ii) The first trading day of a delisted stock entering the delisting period;

(iii) The first trading day of a stock relisted after delisting;

(iv) Other circumstances as determined by this firm.

With the approval of the China Securities Regulatory Commission, the Exchange may adjust the daily price

fluctuation limits for securities.

3.3.14 When buying or selling stocks, limit orders placed during the continuous trading phase must meet the following requirements for valid order price ranges:

(a) The bid price shall not exceed the higher of 102% of the bid benchmark price and the ten smallest bid price increments above the bid benchmark price;

(ii) The selling price shall not be lower than 98% of the selling benchmark price and the lower of the ten smallest price increments below the selling benchmark price.

The benchmark price for buying (selling) mentioned in the preceding paragraph is the lowest selling (highest buying) bid price disclosed in real time; if there is no lowest selling (highest buying) bid price disclosed in real time, it is the highest buying (lowest selling) bid price disclosed in real time; if there is no highest buying (lowest selling) bid price disclosed in real time, it is the latest transaction price; if there is no transaction on the day, it is the previous closing price.

The provisions of the preceding two paragraphs do not apply to price limit orders submitted during the temporary suspension period of trading.

Depending on market conditions, the exchange may adjust the range of valid bid prices for stocks.

3.3.15 Unless otherwise stipulated by the Exchange, for the trading of stocks without price fluctuation limits, limit orders submitted during the call auction phase and the trading halt phase during the trading day shall meet the following requirements for valid order price ranges:

(a) During the opening call auction phase, the bid price shall not exceed 900% of the previous closing price and shall not be lower than 50% of the previous closing price;

(ii) During the closing call auction and the suspension of trading during the market opening, the transaction bid price shall not be higher than 110% of the latest transaction price and not lower than 90% of the latest transaction price.

If there are no transactions on a given day, the previous closing price will be considered the latest transaction price.

Depending on market conditions, the exchange may adjust the range of valid bid prices for stocks.

3.3.16 When buying or selling securities of this exchange, the quoted price must comply with the relevant provisions on price fluctuation limits and the relevant requirements of these rules ; otherwise, the quote will be invalid .

3.3.17 The calculation results of the price limit and

the valid bid price range shall be rounded to the smallest unit of change of the bid price.

If the absolute value of the difference between the price limit and the previous closing price, or the difference between the upper or lower limit of the valid bid price range and the benchmark price, is lower than the minimum bid price fluctuation unit, the corresponding price shall be calculated by adding or subtracting one minimum bid price fluctuation unit from the previous closing price or the benchmark price.

If the price limit for price fluctuations or the upper or lower limit of the valid bid price range is lower than the minimum bid price fluctuation unit, the minimum bid price fluctuation unit shall be used as the corresponding price.

3.3.18 Applications are valid only on the day of submission. If an application for a transaction cannot be fully executed at once, the unexecuted portion will continue to participate in the auction that day, unless otherwise stipulated in these rules.

Section 4 Bidding

3.4.1 Securities auction trading adopts two methods: call auction and continuous auction.

Call auction refers to a bidding method in which buy and sell orders accepted within a specified time are

matched together in one go.

Continuous bidding refers to a bidding method that matches buy and sell orders one by one.

3.4.2 Buy and sell orders that are not executed in the current auction trading phase will automatically enter the subsequent auction trading phases of the same day .

Fifth transaction

3.5.1 Securities auction transactions are matched and executed according to the principle of price priority and time priority.

The principle of price priority in transaction execution is as follows: higher-priced buy orders take precedence over lower-priced buy orders, and lower-priced sell orders take precedence over higher-priced sell orders.

The principle of time priority in transaction execution is as follows: for buy and sell orders with the same direction and price, the order of submission is determined by the time the trading system accepts the orders.

3.5.2 During the call auction, the principle for determining the transaction price is as follows:

(a) The price at which the maximum trading volume can be achieved;

(ii) The price at which all buy orders above this price

and sell orders below this price are executed;

(iii) The price at which at least one party, either the buyer or the seller, has completed the transaction.

If two or more bid prices meet the above conditions, the bid price that results in the smallest unexecuted volume shall be the transaction price; if there are still two or more bid prices that result in the smallest unexecuted volume that meet the above conditions, the median price shall be the transaction price.

All trades in a call auction are executed at the same price.

3.5.3 During continuous bidding, the principle for determining the transaction price is as follows:

(a) If the highest bid price is the same as the lowest ask price, the transaction price shall be the same.

(ii) If the bid price is higher than the lowest bid price disclosed in real time, the lowest bid price disclosed in real time shall be the transaction price;

(iii) If the selling price is lower than the highest buying price disclosed at the moment, the highest buying price disclosed at the moment shall be the transaction price.

3.5.4 If the price reached according to the transaction principle is not within the minimum price fluctuation unit of the declared price, it shall be rounded to the

corresponding minimum price fluctuation unit according to the rounding principle.

3.5.5 Once a buy or sell order is matched and executed by the trading system, the transaction is considered complete. Transactions that comply with all provisions of these rules become effective upon completion, and both the buyer and seller must acknowledge the transaction results and fulfill their clearing and settlement obligations.

For transactions that result in serious consequences due to force majeure, unforeseen events, or unauthorized intrusion into the trading system, the exchange may take appropriate measures or declare them invalid.

For transactions that are manifestly unfair, the firm may take appropriate measures upon its determination.

Any transaction that violates these rules and seriously disrupts the normal operation of the securities market shall be cancelled by this court, and any losses incurred shall be borne by the violator.

3.5.6 For transactions executed in accordance with these rules, the transaction results shall be based on the transaction data recorded by the exchange's trading system.

3.5.7 The clearing and settlement of securities transactions shall be handled in accordance with the regulations of the securities registration and settlement

institution.

Section 6 Bulk Transactions

3.6.1 Securities trading on this exchange may be conducted via block trades if the following conditions are met:

(i) The number of shares traded in a single A-share transaction shall not be less than 300,000 shares, or the transaction amount shall not be less than RMB 2 million;

(ii) The number of shares traded in a single transaction for B shares shall not be less than 300,000 shares, or the transaction amount shall not be less than US\$200,000;

(iii) The number of units in a single fund transaction shall not be less than 2 million units, or the transaction amount shall not be less than 2 million yuan;

The exchange may adjust the minimum limit for block trades based on market conditions.

3.6.2 This exchange accepts the following block trade declarations:

(a) Declaration of Intent;
(ii) Transaction declaration;
(iii) Fixed price declaration;
(iv) Other block trade declarations recognized by the Exchange.

3.6.3 The times for accepting block trade submissions

on each trading day are as follows:

(a) Applications of intent will be accepted from 9:30 to 11:30 and from 13:00 to 15:30;

(ii) Transaction declarations will be accepted from 9:30 to 11:30, 13:00 to 15:30, and 16:00 to 17:00;

(iii) Fixed price declarations will be accepted from 15:00 to 15:30.

Securities that remain suspended from trading at 15:00 on a trading day will not be eligible for block trade applications from the Exchange on that day.

The confirmation period for block trade transactions is from 15:00 to 15:30 each trading day.

3.6.4 Transactions confirmed between 9:30 and 15:30 on each trading day shall be settled and cleared on the same day.

Transactions confirmed between 16:00 and 17:00 on each trading day will be settled and cleared on the next trading day.

3.6.5 The intention declaration instruction shall include the securities account number, securities code, and buy/sell direction, etc.

Intent declarations must be truthful and valid. If the price declared by the declaring party is not specified, it is deemed that the party is willing to buy at least at the minimum price or sell at the maximum price specified; if

the quantity is not specified, it is deemed that the party is willing to complete the transaction at least the minimum quantity declared for a single transaction in a block trade.

3.6.6 When an expression of intent is accepted by a member (including when another member offers a better price than the expression of intent), the applicant shall submit a transaction application with at least one member who accepted the expression of intent.

3.6.7 After the buyer and seller reach an agreement on a block trade, they shall entrust a member to submit a transaction declaration to the exchange's trading system through the trading business unit. The declaration instruction shall include the following:

- (a) Securities Code;
- (ii) Securities account;
- (iii) Direction of buying and selling;
- (iv) Transaction price;
- (v) Transaction volume;
- (vi) Other provisions of this office.

The security code, transaction price, and transaction quantity in the transaction declaration must be consistent.

3.6.8 After the buyer and seller reach an agreement, they shall submit a transaction declaration to the

exchange's trading system. The declared transaction price and quantity must be consistent.

Unless otherwise stipulated by the Exchange, once the transaction declaration and transaction result of a block trade are confirmed by the Exchange, they cannot be withdrawn or changed. Both the buyer and seller must acknowledge the transaction result and fulfill their clearing and settlement obligations.

3.6.9 When submitting a fixed-price bid, both the buyer and seller may submit the bid based on the closing price of the day's auction market or the volume-weighted average price of the day's trading.

Fixed-price order instructions should include the securities account number, securities code, buy/sell direction, transaction type, and transaction quantity.

Fixed-price bids can be withdrawn during the bidding period; after the bidding period ends, the exchange will match and execute fixed-price bids based on the principle of time priority. Unmatched bids will be automatically withdrawn.

3.6.10 The transaction price of securities with price fluctuation limits shall be determined by the buyer and seller within the daily price fluctuation limit.

For securities without price fluctuation limits, the bid price for a transaction shall not exceed the lower of

120% of the average real-time transaction price of the security on that day and the highest transaction price already executed, and shall not be lower than the higher of 80% of the average real-time transaction price of the security on that day and the lowest transaction price already executed.

The formula for calculating the average price is:
$$\text{Average price} = \text{Total transaction amount} / \text{Number of shares traded}.$$

The calculation results are rounded to the smallest unit of change in the declared price.

Orders accepted between 16:00 and 17:00 on each trading day are subject to the price limits accepted during other trading sessions of the day.

3.6.11 Members shall ensure that participants in block trades actually possess the securities or funds corresponding to their declarations.

Institutions that hold or lease trading units of the Exchange to participate in block trades shall submit their applications through the trading units they hold or lease, and ensure that they possess the securities or funds corresponding to the applications.

3.6.12 Block trades are not included in the calculation of the exchange's real-time market data and indices, but the trading volume is included in the total trading volume

of the security after the block trade is completed.

3.6.13 The Exchange will publish the following trading information on its website after the close of each trading day:

(a) Block trades of securities shall include: securities code, securities abbreviation, transaction volume, transaction price and the names of the securities business departments of both the buyer and seller;

(ii) The trading volume and transaction amount of a single security at a fixed price, and the names of the five member securities business departments with the largest purchase and sale amounts of the security on that day, and their respective purchase and sale amounts.

3.6.14 If a block trade involves statutory information disclosure requirements, both the buyer and seller shall fulfill their information disclosure obligations in accordance with relevant laws and regulations.

Chapter Four Other Transaction Matters

Section 1 Opening Price and Closing Price

4.1.1 The opening price of a security is the price of the first transaction of that security on that day.

4.1.2 The opening price of a security is generated through a call auction. If an opening price cannot be generated, it is generated through continuous auction.

4.1.3 Unless otherwise provided in these rules, the closing price of a security shall be determined through a closing auction. If the closing auction fails to produce a closing price or no closing auction is conducted, the closing price shall be the volume-weighted average price of all transactions in the minute preceding the last transaction of the day (including the last transaction).

The closing price of a fund is the volume-weighted average price of all transactions in the minute preceding the last transaction of the day (including the last transaction).

If there are no transactions on a given day, the previous closing price will be used as the closing price for that day.

Section 2 Listing, Delisting, Suspension and Resumption of Trading

4.2.1 This exchange conducts trading on listed securities.

4.2.2 If a security's listing period expires or it no longer meets the listing requirements by law, the Exchange will terminate its listing and delist it.

4.2.3 The Exchange may impose a special suspension on securities suspected of illegal or irregular trading and issue a public announcement. The relevant parties shall submit a written report as required by the Exchange.

The timing and manner of special suspensions and resumptions of trading shall be determined by the Exchange.

4.2.4 The Exchange will implement a temporary intraday trading halt if any of the following circumstances occur during the competitive bidding process of the Exchange's stocks. The duration of a single temporary intraday trading halt shall be 10 minutes:

(a) For stocks without price fluctuation limits, the intraday trading price rises or falls by 30% or more compared to the opening price of the day for the first time;

(ii) For stocks without price fluctuation limits, the intraday trading price increases or decreases by 60% or more compared to the opening price of the day for the first time;

(iii) Other circumstances as determined by the China Securities Regulatory Commission or the Exchange.

4.2.5 If a security is suspended from trading during the market opening period, any orders that were not executed before the suspension will be included in the trading after the security resumes trading on the same day. During the suspension period, orders can be submitted or cancelled. Upon resumption of trading, accepted orders will be subject to a call auction. During the suspension and call auction periods, the virtual reference price, virtual matched volume, and virtual unmatched volume of the

call auction will not be disclosed.

The suspension and resumption times for securities are subject to the announcements of the Exchange. If a securities suspension period extends beyond 14:57 and must resume trading on the same day, trading will resume at 14:57, and a resumption call auction will be held for accepted orders, followed by a closing call auction.

4.2.6 The Exchange shall issue an announcement regarding the listing, delisting, suspension, and resumption of trading of securities.

4.2.7 When a security is suspended from trading, the exchange's market data includes information about that security; after a security is delisted, its market data will no longer include information about that security.

4.2.8 Other provisions regarding the listing, delisting, suspension and resumption of trading of securities shall be implemented in accordance with the listing rules of this exchange or other relevant regulations.

Section 3 Ex-rights and Ex-interest

4.3.1 When listed securities undergo rights distribution, capitalization of reserves, rights issues, or other similar events, the Exchange shall process the ex-rights and ex-dividend treatment of the securities on the trading day following the record date (the last trading

day for B shares), unless otherwise stipulated by the Exchange.

4.3.2 The formula for calculating the ex-rights (ex-dividend) reference price is as follows:

Ex-rights (dividend) reference price = [(previous closing price - cash dividend) + rights issue price × change in circulating shares] / (1 + change in circulating shares).

If a securities issuer deems it necessary to adjust the above calculation formula, it may submit an adjustment application to the Exchange, explaining the reasons. The Exchange may decide to adjust the ex-rights (ex-dividend) reference price calculation formula based on the application and will publish the decision.

The closing price of the security displayed in the real-time market data on the ex-rights (ex-dividend) date is the ex-rights (ex-dividend) reference price.

4.3.3 For securities trading on the ex-rights (ex-dividend) date, the ex-rights (ex-dividend) reference price shall be used as the benchmark for calculating the price fluctuation range, unless otherwise stipulated by the Exchange.

Section 4 Risk Warning Board Trading Matters

4.4.1 The Exchange has established a Risk Warning Board for Listed Companies (hereinafter referred to as the

Risk Warning Board). Main Board stocks subject to risk warnings under the "Shanghai Stock Exchange Stock Listing Rules" (hereinafter referred to as Risk Warning Stocks), and Main Board stocks for which the Exchange has made a delisting decision but are in the delisting period and have not yet been delisted (hereinafter referred to as Delisting Stocks), will be traded on the Risk Warning Board, and the provisions of this section shall apply. Where this section does not provide otherwise, these rules and other relevant provisions shall apply.

4.4.2 If a listed company's stock is subject to delisting risk warning or other risk warnings, it shall be traded on the risk warning board from the date the risk warning measures are implemented until the trading day preceding the date the measures are revoked.

4.4.3 Stocks undergoing delisting will be traded on the risk warning board for 15 trading days from the start of the delisting period. The exchange will delist the stock within 5 trading days after the expiration of this period, and the company's stock will be terminated from listing .

If a delisted stock is suspended from trading for the entire day during the risk warning board period, the suspension period will not be counted towards the 15 delisting trading days stipulated in the preceding

paragraph. The total number of days of full-day suspension shall not exceed 5 trading days.

4.4.4 Trading information for risk-alert stocks and stocks undergoing delisting shall be disclosed separately from the trading information of other stocks. Members shall display the trading information for these two types of stocks accordingly and independently .

4.4.5 Individual investors who purchase delisted stocks must have more than 24 months of stock trading experience, and the average daily assets in their securities and cash accounts opened in their own name (excluding securities and funds borrowed through margin trading) must be more than RMB 500,000 in the 20 trading days prior to applying for the trading permission .

Individual investors who do not meet the above requirements may only sell the delisted stocks they already hold.

4.4.6 Members shall, in accordance with the requirements of these Measures , conduct a prudent assessment of the suitability of individual investors to participate in the trading of delisted stocks, and shall not accept entrustment from investors who do not meet the suitability conditions to purchase delisted stocks.

Investors should prudently decide whether to participate in the trading of delisted stocks based on the

suitability requirements stipulated in these Measures and their own risk tolerance, and shall not refuse to assume the responsibility for trading and settlement of delisted stocks on the grounds that they do not meet the suitability conditions.

4.4.7 Members shall require ordinary investors who are placing their first order to purchase risk-alert stocks or delisted stocks to sign a risk disclosure statement for both the risk-alert stock and delisted stock statements, either in paper or electronic form. Members shall not accept purchase orders from clients who have not signed the risk disclosure statement .

4.4.8 Members shall, through various channels such as their business premises, company websites, and trading systems, highlight the trading risks of risk-alert stocks and stocks undergoing delisting; for stocks undergoing delisting, they shall also inform customers of the remaining trading days of the relevant stocks before the opening of each trading day.

4.4.9 Investors should use limit orders when buying or selling risk-alert stocks and stocks undergoing delisting .

4.4.10 The price fluctuation limit for risk-alert stocks is 5%, and the price fluctuation limit for delisted stocks is 10%.

4.4.11 Risk Warning: If the cumulative deviation of the daily closing price of a stock reaches $\pm 12\%$ within three consecutive trading days, it is considered abnormal fluctuation. The exchange will publish the names of the five member brokerage firms with the largest cumulative buy and sell amounts during the period of abnormal fluctuation for that stock, along with their respective buy and sell amounts.

4.4.12 The number of shares of a single risk-alert stock that an investor may purchase in a single day through competitive bidding and block trading shall not exceed 500,000 shares .

The total number of risk-alert stocks purchased by an investor on a given day is calculated by combining the purchase volume of the investor's securities account opened in their own name and their margin trading account; the sum of the number of shares placed by an investor, the number of shares already purchased on that day, and the number of shares submitted for purchase but not yet executed or cancelled, shall not exceed 500,000 shares. Share buybacks by listed companies and share purchases by shareholders holding 5% or more of the shares according to disclosed shareholding increase plans are exempt from the aforementioned 500,000-share purchase limit.

Members shall take effective measures to monitor the

number of times an investor buys a single risk-alert stock on a given day; if a client is found to have violated the preceding two paragraphs, the member shall issue a warning and take measures to stop the violation, and report the violation to the exchange in a timely manner.

4.4.13 During the delisting period, the Exchange will publish the names of the five member securities business departments with the largest buy and sell amounts on that day, as well as their respective buy and sell amounts .

4.4.14 During the delisting period, trading is not included in the calculation of the exchange's indices, but the trading volume is included in the total market trading volume for that day .

Chapter Five Transaction Information

Section 1 General Provisions

5.1.1 The Exchange publishes real-time securities trading quotes, securities indices, and other trading information, including public securities trading information, on each trading day.

5.1.2 The exchange shall promptly compile and publish various daily, weekly, monthly and annual reports reflecting market transaction conditions.

5.1.3 All transaction information generated in this exchange's market belongs to this exchange. No

organization or individual may use or disseminate it without the exchange's permission.

Institutions and individuals authorized by this exchange to use transaction information shall not provide or disseminate this transaction information to other institutions or individuals without the consent of this exchange.

5.1.4 The management measures for securities trading information shall be separately stipulated by the Exchange.

Section 2 Real-time Market Data

5.2.1 During the opening call auction period from 9:15 to 9:25 and the closing call auction period from 14:57 to 15:00 on each trading day, the real-time market information includes: security code, security abbreviation, previous closing price, virtual reference price for the call auction, virtual matched volume, and virtual unmatched volume.

5.2.2 During continuous bidding, the real-time market information includes: security code, security abbreviation, previous closing price, latest transaction price, highest transaction price of the day, lowest transaction price of the day, cumulative transaction volume of the day, cumulative transaction amount of the day, the highest 5 buy order prices and quantities in real time, and the lowest 5 sell order prices and quantities in real

time.

5.2.3 On the first day of listing, the closing price displayed in the real-time market data of a security is its issue price, unless otherwise stipulated by the Exchange.

5.2.4 Real-time market data is transmitted to all trading participants through the communication system, and trading participants shall use it within the scope permitted by the Exchange.

5.2.5 The Exchange may adjust the method and content of real-time market information releases as needed for market development.

Section 3 Securities Indices

5.3.1 This exchange compiles securities indices such as composite indices, component indices, and sector indices to reflect the changes and trends in the overall price of securities or the price of a certain type of securities, and releases market information in real time.

5.3.2 The compilation of securities indices follows the principles of openness and transparency.

5.3.3 The specific methods for setting and compiling securities indices shall be separately stipulated by the Exchange.

Section 4 Public Information on Securities Transactions

5.4.1 If any of the following situations occur in the competitive bidding trading of stocks or closed-end funds

with price fluctuation limits, the Exchange will publish the names of the five member brokerage firms with the largest buy and sell amounts on that day, along with their buy and sell amounts:

(a) The top 5 stocks (funds) whose daily closing price deviation reaches $\pm 7\%$ are calculated using the following formula: closing price deviation = stock (fund) price change – corresponding category index price change.

(ii) The top 5 stocks (funds) with a daily price fluctuation of 15% are calculated using the following formula: Price fluctuation = (Highest price of the day – Lowest price of the day) / Lowest price of the day $\times 100\%$;

(iii) The top 5 stocks (funds) with a daily turnover rate of 20% are calculated as follows: Turnover rate = number of shares traded (shares) / number of shares in circulation without restrictions (shares) $\times 100\%$.

If the closing price deviation, price amplitude, or turnover rate are the same, the selection will be based on transaction amount and transaction volume in that order.

The corresponding category indices include the SSE A-Share Index, SSE B-Share Index, and SSE Fund Index compiled by this exchange.

For stocks without price fluctuation limits as stipulated in Article 3.3.13, the Exchange will publish the names of the five member brokerage firms with the largest

buy and sell amounts on the first trading day, along with their buy and sell amounts.

5.4.2 Any of the following situations in the competitive bidding trading of stocks and closed-end funds shall be considered abnormal fluctuations, and the Exchange shall publish the names of the five member brokerage firms with the largest cumulative purchase and sale amounts during the period of abnormal fluctuations in the trading of the stock or closed-end fund, along with their purchase and sale amounts:

(i) If the cumulative deviation of the daily closing price within three consecutive trading days reaches $\pm 20\%$, the formula for calculating the cumulative deviation of the closing price is: Cumulative deviation of closing price = $(\text{Closing price at the end of the period} / \text{Closing price at the beginning of the period} - 1) \times 100\% - (\text{Closing points at the end of the period of the corresponding index} / \text{Closing points at the beginning of the period} - 1) \times 100\%$. If the security has undergone ex-rights or ex-dividend during the period, the closing price will be adjusted accordingly.

(ii) The ratio of the average daily turnover rate over three consecutive trading days to the average daily turnover rate over the previous five trading days reaches

30 times, and the cumulative turnover rate of the stock or closed-end fund over three consecutive trading days reaches 20%;

(iii) Other circumstances that the China Securities Regulatory Commission or the Exchange deems to be abnormal fluctuations.

The abnormal fluctuation indicator will be recalculated from the next trading day following the announcement by the exchange or from the date of resumption of trading.

5.4.3 Any of the following situations in stock auction trading constitutes a serious abnormal fluctuation, and the Exchange will publish information such as investor classification and trading statistics during the period of serious abnormal fluctuation:

(i) The abnormal fluctuations in the same direction specified in Article 4.4.11 or Article 5.4.2, Item 1, occur four times within 10 consecutive trading days;

(ii) The cumulative deviation of the daily closing price within 10 consecutive trading days reaches +100% (-50%).

(iii) The cumulative deviation of the daily closing price within 30 consecutive trading days reaches +200% (-70%).

(iv) Other circumstances that the China Securities

Regulatory Commission or the Exchange deems to be serious abnormal fluctuations.

In the event of multiple instances of severe abnormal fluctuations in stock trading, this exchange will publish them all at once.

The severe abnormal fluctuation indicator will be recalculated from the next trading day following the announcement by the exchange or from the date of resumption of trading.

5.4.4 If there are serious abnormal fluctuations in stock trading, the listed company shall promptly investigate and take corresponding measures in accordance with the listing rules.

If, after verification by the listed company, there are no undisclosed material matters that should be disclosed, and the company is unable to provide a reasonable explanation for the abnormal fluctuations, in addition to handling the matter in accordance with the listing rules, the Exchange may, based on market conditions, strengthen the monitoring of abnormal transactions and require members to take effective measures to alert clients to the risks.

5.4.5 Stocks without price fluctuation limits are not included in the calculation of abnormal fluctuation and severe abnormal fluctuation indicators.

5.4.6 The Exchange may adjust the criteria for identifying abnormal fluctuations and severe abnormal fluctuations based on market conditions.

5.4.7 When this exchange implements a special suspension of trading in securities pursuant to Article 4.2.3, it may disclose the following information as needed:

(a) The names of the five member brokerage firms with the largest transaction amounts, their buy and sell quantities, and their buy and sell amounts;

(ii) Shareholding statistics;

(iii) Other information that this firm deems should be disclosed.

5.4.8 When public information on securities transactions involves institutions, the published name shall be "For Institutional Use Only".

5.4.9 The Exchange may adjust the content of publicly available securities trading information as needed for market development.

Chapter VI Special Provisions for Trading on the Science and Technology Innovation Board

Section 1 General Provisions

6.1.1 The trading of stocks and depositary receipts listed on the Science and Technology Innovation Board of this Exchange shall be governed by the provisions of this chapter. Where this chapter does not provide otherwise,

these rules and other relevant provisions shall apply.

6.1.2 Individual investors participating in the trading of stocks on the Science and Technology Innovation Board shall meet the following conditions:

(i) The average daily assets in the securities account and cash account for the 20 trading days prior to the application for access shall not be less than RMB 500,000 (excluding funds and securities borrowed by the investor through margin trading).

(ii) Having participated in securities trading for more than 24 months;

(iii) Other conditions stipulated by this office.

Institutional investors participating in the trading of stocks on the Science and Technology Innovation Board shall comply with the provisions of laws, regulations and the business rules of the exchange.

The exchange may adjust the above conditions according to market conditions.

6.1.3 Members shall require ordinary investors who are placing their first order to purchase shares on the Science and Technology Innovation Board (STAR Market) to sign a risk disclosure statement for STAR Market stock trading in paper or electronic form. The risk disclosure statement shall fully disclose the main risk characteristics of the STAR Market. Members shall not

accept subscription or purchase orders from clients who have not signed the risk disclosure statement.

6.1.4 The trading of stocks on the Science and Technology Innovation Board can implement a market maker mechanism, and market makers can provide two-sided quotation services for stocks on the Science and Technology Innovation Board.

Market makers shall comply with laws and regulations and the relevant business rules of the exchange , and shall undertake obligations such as providing continuous two-sided quotes and responding to quotes for STAR Market stocks in accordance with the provisions of the market making agreement .

The conditions, rights, obligations, and supervision of market makers for stocks listed on the Science and Technology Innovation Board shall be separately stipulated by the exchange and shall take effect upon approval by the China Securities Regulatory Commission.

6.1.5 Securities companies may borrow shares listed on the Science and Technology Innovation Board in accordance with regulations, and specific details will be stipulated separately.

6.1.6 The exchange imposes price fluctuation limits on the trading of stocks listed on the Science and Technology Innovation Board, with a fluctuation limit of 20%.

Stocks listed on the Science and Technology Innovation Board that fall under any of the following categories are not subject to price fluctuation limits:

(a) The first five trading days after the initial public offering (IPO) of the shares;

(ii) The first trading day of a delisted stock entering the delisting period;

(iii) Other circumstances as determined by this firm.

The following funds listed and traded on this exchange have a daily price fluctuation limit of 20%:

(i) Exchange-traded open-ended index funds and index-based listed open-ended funds whose constituent stocks are only stocks listed on the Science and Technology Innovation Board or other stocks with a daily price fluctuation limit of 20% .

(ii) According to the fund contract, the proportion of fund assets invested in stocks on the Science and Technology Innovation Board or other stocks with a daily price fluctuation limit of 20% shall not be less than 80% of the non-cash fund assets.

6.1.7 For limit orders to buy or sell STAR Market stocks, the quantity of a single order shall not be less than 200 shares and shall not exceed 100,000 shares; for market orders, the quantity of a single order shall not be less than 200 shares and shall not exceed 50,000 shares. When

selling, any remaining shares less than 200 shares shall be sold in a single order.

6.1.8 For trading of stocks listed on the Science and Technology Innovation Board, limit orders submitted during the continuous trading phase must meet the following requirements for valid order price ranges :

(a) The bid price shall not exceed 102% of the benchmark bid price;

(ii) The selling price shall not be lower than 98% of the selling benchmark price.

The benchmark price for buying (selling) mentioned in the preceding paragraph is the lowest selling (highest buying) bid price disclosed in real time; if there is no lowest selling (highest buying) bid price disclosed in real time, it is the highest buying (lowest selling) bid price disclosed in real time; if there is no highest buying (lowest selling) bid price disclosed in real time, it is the latest transaction price; if there is no transaction on the day, it is the previous closing price.

There are no requirements regarding the valid price range for limit orders during the call auction phase and the trading halt phase during the market opening.

6.1.9 If any of the following situations occur in the competitive bidding trading of STAR Market stocks with price fluctuation limits , the Exchange will publish the

names of the five member brokerage firms with the largest buy and sell amounts on that day, along with their buy and sell amounts:

(a) The top 5 stocks whose daily closing price changes by $\pm 15\%$;

(ii) The top 5 stocks with a daily price fluctuation of 30%;

(iii) The top 5 stocks with a daily turnover rate of 30%.

If the closing price change, price volatility, or turnover rate are the same, the selection will be based on transaction amount and transaction volume in that order.

Stocks listed on the Science and Technology Innovation Board without price fluctuation limits are not subject to the provisions of Section 5.4.1, Paragraph 4.

6.1.10 Any of the following situations in the competitive bidding trading of stocks on the Science and Technology Innovation Board constitutes abnormal fluctuations. The Exchange will publish the names of the five member brokerage firms with the largest cumulative buy and sell amounts during the period of abnormal fluctuations in the trading of such stocks, along with their buy and sell amounts:

(i) The cumulative deviation of the daily closing price within three consecutive trading days reaches $\pm 30\%$;

(ii) Other circumstances that the China Securities Regulatory Commission or the Exchange deems to be abnormal fluctuations.

The abnormal fluctuation indicator will be recalculated from the next trading day following the announcement by the exchange or from the date of resumption of trading .

6.1.11 Any of the following situations in the competitive bidding trading of stocks on the Science and Technology Innovation Board constitutes a serious abnormal fluctuation, and the Exchange will publish information such as investor classification and trading statistics during the period of serious abnormal fluctuation:

(i) The abnormal fluctuations in the same direction as specified in Article 6.1.10, Paragraph 1, occur three times within 10 consecutive trading days;

(ii) The cumulative deviation of the daily closing price within 10 consecutive trading days reaches +100% (-50%);

(iii) The cumulative deviation of the daily closing price within 30 consecutive trading days reaches +200% (-70%).

(iv) Other circumstances that the China Securities Regulatory Commission or the Exchange deems to be serious abnormal fluctuations.

In the event of any serious abnormal fluctuations in the trading of stocks on the Science and Technology Innovation Board, this exchange will make a public announcement.

will be recalculated from the next trading day following the announcement by the exchange or from the date of resumption of trading .

6.1.12 The closing price deviation is the difference between the price change of a single STAR Market stock and the price change of the corresponding benchmark index.

The corresponding benchmark index refers to the SSE STAR Market 50 Component Index compiled by this exchange.

The exchange will assess and adjust the aforementioned benchmark indices in a timely manner based on the development of the Science and Technology Innovation Board market, and will announce such adjustments to the market.

Stocks listed on the Science and Technology Innovation Board without price fluctuation limits are not included in the calculation of abnormal fluctuation and severe abnormal fluctuation indicators.

6.1.13 The Exchange accepts and confirms block trade orders for STAR Market stocks from 9:30 to 11:30 and from 13:00 to 15:30 on each trading day.

Fixed-price order placement regulations do not apply to block trades of stocks listed on the Science and

Technology Innovation Board.

6.1.14 STAR Market stocks that are subject to delisting risk warnings in accordance with the "Shanghai Stock Exchange STAR Market Stock Listing Rules" and STAR Market stocks that have been terminated from listing by the Exchange but are in the delisting period and have not yet been delisted will not be traded on the risk warning board.

During the delisting period for stocks listed on the Science and Technology Innovation Board, the exchange will publish the names of the five member securities business departments with the largest buy and sell amounts on that day, as well as their respective buy and sell amounts.

Section 2 After-Hours Fixed-Price Trading

6.2.1 Investors can buy and sell STAR Market stocks through after-hours fixed-price trading.

6.2.2 After-hours fixed-price trading refers to a trading method in which, after the closing call auction ends, the exchange's trading system matches closing price orders in order of time priority and executes the trades at the closing price of the day.

The fixed-price trading period is from 15:05 to 15:30 on each trading day. Stocks that are still suspended from trading at 15:00 on the same day will not participate in the fixed-price trading after the market closes.

6.2.3 The Exchange accepts closing price declarations

from trading participants from 9:30 to 11:30 and from 13:00 to 15:30 on each trading day .

If a stock is suspended from trading during the trading day, orders can still be placed during the suspension period. If trading resumes on the same day as the suspension, accepted orders will participate in the after-hours fixed-price trading after the resumption of trading. If a stock is still suspended at 15:00 on the same day, the exchange's trading system will no longer accept closing price orders, and any closing price orders accepted on that day will be invalid.

Unexecuted orders can be cancelled within the order submission period. Cancellation orders are only valid after confirmation by the exchange's trading system.

6.2.4 When a client buys or sells STAR Market stocks through after-hours fixed-price trading, the client shall submit a closing price order to the member.

Closing price order instructions should include: securities account number, securities code, buy/sell direction, limit price, and order quantity.

6.2.5 The Exchange accepts closing price declarations from trading participants in after-hours fixed-price trading.

The closing price order should include the securities account number, securities code, brokerage code, buy/sell

direction, limit price, quantity, etc.

If the closing price is higher than the limit price of a buy order at the closing price, the buy order is invalid; if the closing price is lower than the limit price of a sell order at the closing price, the sell order is invalid.

6.2.6 When placing orders to buy or sell STAR Market stocks through closing price, the number of shares in a single order shall not be less than 200 shares (units) and shall not exceed 1 million shares (units).

When selling, any remaining balance of less than 200 shares should be declared for sale in one go.

6.2.7 Closing price declarations are valid only on the day of submission.

6.2.8 During the after-hours fixed-price trading phase, the exchange uses the closing price as the transaction price and performs continuous matching of closing price orders on a time-priority basis.

6.2.9 From 9:30 to 15:05 on each trading day, closing price orders are not included in real-time market data; from 15:05 to 15:30, orders and transactions during the after-hours fixed-price trading phase are included in real-time market data.

Real-time market data includes: security code, security abbreviation, closing price, total trading volume of after-hours fixed-price trading for the day, total

trading value of after-hours fixed-price trading for the day, and real-time order quantity for buy or sell.

6.2.10 The trading volume and value of after-hours fixed-price trading are included in the total trading volume and total trading value of the stock on that day after the end of after-hours fixed-price trading.

6.2.11 Shares sold through after-hours fixed-price trading shall be treated as shares sold through competitive bidding and subject to the relevant regulations on share sales.

Chapter Seven: Supervision of Securities Transactions

7.1 The Exchange will focus on monitoring the following matters in securities trading:

(i) Suspected illegal and irregular activities such as insider trading, market manipulation, and trading using undisclosed information;

(ii) Actions involving securities trading where the timing, quantity, or method is restricted by laws, regulations, and the Exchange's business rules;

(iii) Abnormal trading activities that may affect the price or volume of securities trading;

(iv) Securities with obviously abnormal trading prices or trading volumes;

(v) Other matters that the China Securities Regulatory Commission or the Exchange deems necessary to monitor

closely.

7.2 Abnormal trading behaviors that may affect the price or volume of securities include:

(a) False declaration, that is, without the purpose of completing a transaction, by submitting and canceling a large number of declarations in order to induce, mislead or influence other investors' normal trading decisions;

(ii) Price manipulation, namely, large orders, continuous orders, concentrated orders, or orders placed at prices that are significantly deviated from the latest transaction price of the securities, during which the securities trading price rises or falls significantly;

(iii) Maintaining the securities trading price or securities trading volume, i.e., large orders, continuous orders, and intensive orders, in order to maintain the securities trading price or securities trading volume at a specific state;

(iv) Engaging in large-scale or frequent self-trading, counterparty transactions, or reverse transactions between individual accounts, accounts under one's actual control, or suspected related accounts;

(v) By submitting large, continuous, or intensive orders, or by submitting orders at prices that are significantly deviating from reasonable value, with the intent to exacerbate abnormal fluctuations in securities

prices or affect the normal trading order of the Exchange;

(vi) Engaging in algorithmic trading by automatically generating or issuing trading instructions through computer programs, thereby affecting the security of the exchange's system or the normal trading order;

(vii) The transaction price deviates significantly from the reasonable value, which is suspected of involving the transfer of benefits through securities trading;

(viii) Engaging in a large number of continuous transactions over a period of time;

(ix) Using the trading of related securities or derivatives to influence the price of securities, or using securities trading to influence the price of related securities or derivatives;

(x) Other abnormal trading behaviors that the China Securities Regulatory Commission or the Exchange deems necessary to monitor closely.

This exchange conducts consolidated monitoring of single or multiple ordinary securities accounts, margin securities accounts, and other securities accounts (groups) suspected of being related, opened in the name of an investor or actually controlled by the same investor.

7.3 Securities with obviously abnormal trading prices or volumes include:

(i) Securities whose transaction prices have risen or

fallen sharply or remained in a specific state for a continuous period of time, and which have deviated significantly from the rise or fall of the relevant index during the same period;

(ii) Securities purchased or sold in large quantities by the same securities brokerage, securities brokerage in the same region, or accounts suspected of being related;

(iii) Other securities that the China Securities Regulatory Commission or the Exchange deems necessary to monitor closely.

7.4 As needed by the market, this exchange may, in conjunction with other securities and futures exchanges and other institutions, conduct investigations into situations such as those described in item 9 of Article 7.2.

7.5 Members shall earnestly fulfill their responsibilities in managing client trading activities and monitor clients' securities trading behavior. If any abnormalities are discovered in a client's trading behavior, the member shall promptly inform, remind, and warn the client. For abnormal trading behavior that may seriously affect the order of securities trading or is suspected of being illegal or irregular, the member shall refuse to accept the client's entrustment in accordance with the securities trading agency agreement and report it to the exchange in a timely manner.

7.6 The Exchange may conduct on-site or off-site investigations into key monitoring matters in securities trading, and may require relevant members and their business departments, other trading participants or investors to provide investor account opening information, power of attorney, fund deposit and withdrawal vouchers, fund account information, relevant transaction information and other materials.

7.7 Members and their business departments, other trading participants and investors shall cooperate with the Exchange in conducting relevant investigations and provide relevant documents and materials in a timely, truthful, accurate and complete manner.

7.8 For the behaviors listed in the key monitoring items in Article 7.1, this office may take the following measures as appropriate:

- (a) Verbal warning;
- (ii) Written warning;
- (iii) Regulatory interviews;
- (iv) The account will be designated as a key monitoring account;
- (v) Require investors to submit a commitment letter regarding compliant transactions;
- (vi) Suspend trading in investor accounts;
- (vii) Suspension of trading by the Stock Exchange of

Hong Kong Securities Trading Services Company;

- (viii) Restricting investor account trading;
- (ix) Other self-regulatory measures stipulated by this office.

If you have any objection to the measures in item 8 of the preceding paragraph, you may submit an application for review to this office. The implementation of the relevant measures will not be suspended during the review period.

Any suspected insider trading, market manipulation, or trading using undisclosed information discovered during transaction monitoring will be promptly reported to the China Securities Regulatory Commission (CSRC) for investigation and prosecution.

Chapter 8 Handling Abnormal Transaction Situations

8.1 If any of the following unforeseen events prevent the normal conduct of some or all securities trading, the Exchange may decide to take measures such as technical suspension or temporary market closure in order to maintain the normal order of securities trading and market fairness:

- (a) Force majeure;
- (ii) Unexpected events;
- (iii) Major technical failure;
- (iv) Major human error;
- (v) Other abnormal circumstances identified by this office.

If a sudden event as described in the preceding paragraph causes a significant abnormality in the securities trading results, and settlement based on the trading results would have a significant impact on the normal order of securities trading and market fairness, the Exchange may take measures such as canceling the transaction or notifying the securities registration and settlement institution to suspend settlement.

8.2 If the number of member business departments experiencing market data transmission interruptions or inability to submit orders exceeds 10% of the total number of business departments, the exchange may implement a temporary market closure.

8.3 If the Exchange believes that abnormal trading situations as defined in Articles 8.1 and 8.2 may occur and that would seriously affect the normal conduct of trading, it may decide to suspend trading technically or temporarily suspend the market.

8.4 The Exchange will issue announcements regarding its decisions on technical suspensions, temporary market closures, cancellations of transactions, and notifications to securities registration and settlement institutions to postpone settlement, and will promptly report to the China Securities Regulatory Commission.

8.5 Once the reasons for a technical suspension or

temporary market closure have been eliminated, the Exchange may decide to resume trading and will issue a public announcement.

8.6 The Exchange will monitor securities trading for risks. In the event of significant abnormal fluctuations, the Exchange may take measures such as restricting trading or forcibly suspending trading, and will report to the China Securities Regulatory Commission (CSRC) ; if the fluctuations seriously affect the stability of the securities market, the Exchange may take measures such as temporary market closure and issue a public announcement. Specific measures will be stipulated separately by the Exchange.

8.7 Except for special circumstances recognized by the Exchange, if trading resumes on the same day after a technical suspension or temporary market closure, orders already accepted by the trading system before the technical suspension or temporary market closure shall remain valid. The trading system shall continue to accept orders during the technical suspension or temporary market closure period, and shall conduct call auction trading on accepted orders upon resumption of trading.

8.8 The Exchange shall not be liable for civil damages for losses caused by abnormal trading conditions, significant abnormal fluctuations, or the corresponding

measures taken by the Exchange, except in cases of gross negligence.

Chapter Nine Transaction Disputes

9.1 In the event of transaction disputes between members or between members and clients, the relevant members shall record the relevant information for the Exchange's review. If a transaction dispute affects normal trading, the member shall promptly report it to the Exchange.

9.2 In the event of a transaction dispute between trading participants or between members and clients, the Exchange may provide necessary transaction data in accordance with relevant regulations.

9.3 If a customer has any questions about a transaction, the member shall coordinate and resolve them.

Chapter Ten Transaction Costs

10.1 When an investor completes a transaction involving securities, he or she shall pay a commission to the member who conducted the transaction on his or her behalf, as required by regulations.

10.2 Trading participants shall pay transaction handling fees and other expenses to the Exchange as required; members shall also pay membership fees to the Exchange as required.

10.3 The fee items, fee standards and management

methods for securities transactions shall be implemented in accordance with relevant regulations.

Chapter Eleven Disciplinary Actions

11.1 If a member or other trading participant violates these rules, the Exchange shall order them to rectify the violation and, depending on the severity of the violation, impose one or more penalties:

- (a) Public reprimand;
- (ii) Public condemnation;
- (iii) Suspend or restrict trading privileges;
- (iv) Cancel the qualification of the participant in the transaction;
- (v) Cancellation of membership.

11.2 If a member or other trading participant has any objection to the disciplinary actions specified in items 2, 3, 4, and 5 of the preceding article, they may apply for a review to the Board of Directors of the Exchange within 15 days from the date of receiving the disciplinary notice. The execution of the relevant disciplinary actions will not be suspended during the review period.

Chapter Twelve Supplementary Provisions

12.1 Other trading matters related to exchange-traded open-ended index funds, warrants, and other similar products shall be separately stipulated by the Exchange.

12.2 The time mentioned in these rules shall be based

on the time of the exchange's trading system.

12.3 In the event of any inconsistency between the Exchange' s regulations concerning abnormal fluctuations in stock and fund trading and these rules, these rules shall prevail.

12.4 The following terms in these rules have the following meanings:

(a) Market: refers to the securities trading market established by this exchange;

(ii) Listing and trading: refers to securities being listed and traded on this exchange;

(iii) Entrustment: refers to the act of an investor authorizing a member to buy or sell securities;

(iv) Reporting: refers to the act of a member sending a securities trading instruction to the exchange's trading system;

(v) Best Price: refers to the highest price offered by buyers or the lowest price offered by sellers in the centralized order book. The centralized order book refers to all unexecuted orders in the trading system at a given point in time, arranged by buy/sell direction and in order of price priority and time priority.

(vi) Virtual reference price for call auction: refers to the price at which all valid orders are virtually executed according to the call auction rules and disclosed

in real time as of the time of disclosure;

(vii) Virtual Matching Quantity: refers to the number of orders that are virtually traded at the virtual reference price of the call auction and disclosed in real time as of the disclosure time;

(viii) Virtual unmatched quantity: refers to the remaining quantity of bids from buyers or sellers that cannot be virtually executed and immediately disclosed at the virtual reference price of the call auction as of the disclosure time.

12.5 The terms “exceeding,” “below,” and “insufficient” in these rules do not include the number itself, while “reaching,” “above,” and “below” include the number itself.

12.6 This rule shall come into effect upon being adopted by the Board of Directors of this Exchange and approved by the China Securities Regulatory Commission, and the same applies to any amendments thereto.

12.7 This rule is subject to interpretation by this firm.

12.8 This rule shall come into effect on the first day of listing of the first main board stock issued in accordance with the "Administrative Measures for the Registration of Initial Public Offerings of Stocks". The "Shanghai Stock Exchange Trading Rules (Second Revision

in 2020)" (SSE Notice [2020] No. 17), the "Special Provisions for Trading of Stocks on the Science and Technology Innovation Board of the Shanghai Stock Exchange" (SSE Notice [2019] No. 23), the "Administrative Measures for Trading of Stocks on the Risk Alert Board of the Shanghai Stock Exchange (Revised in December 2020)" (SSE Notice [2020] No. 103), and the "Guidelines for After-Hours Fixed-Price Trading of Stocks on the Science and Technology Innovation Board of the Shanghai Stock Exchange" (SSE Notice [2019] No. 26) are hereby repealed.
